

# ideaMaker

Comprehensive Slicer Software

ideaMaker is easy-to-use slicer software with effective algorithms, giving users full control of the 3D printing process.

Easily Create Textures

Customize Your Support

Using Automatic Parameters for Optimization

Variable Setting for Selected Regions

Modify Models Freely

Extrusion Process Preview

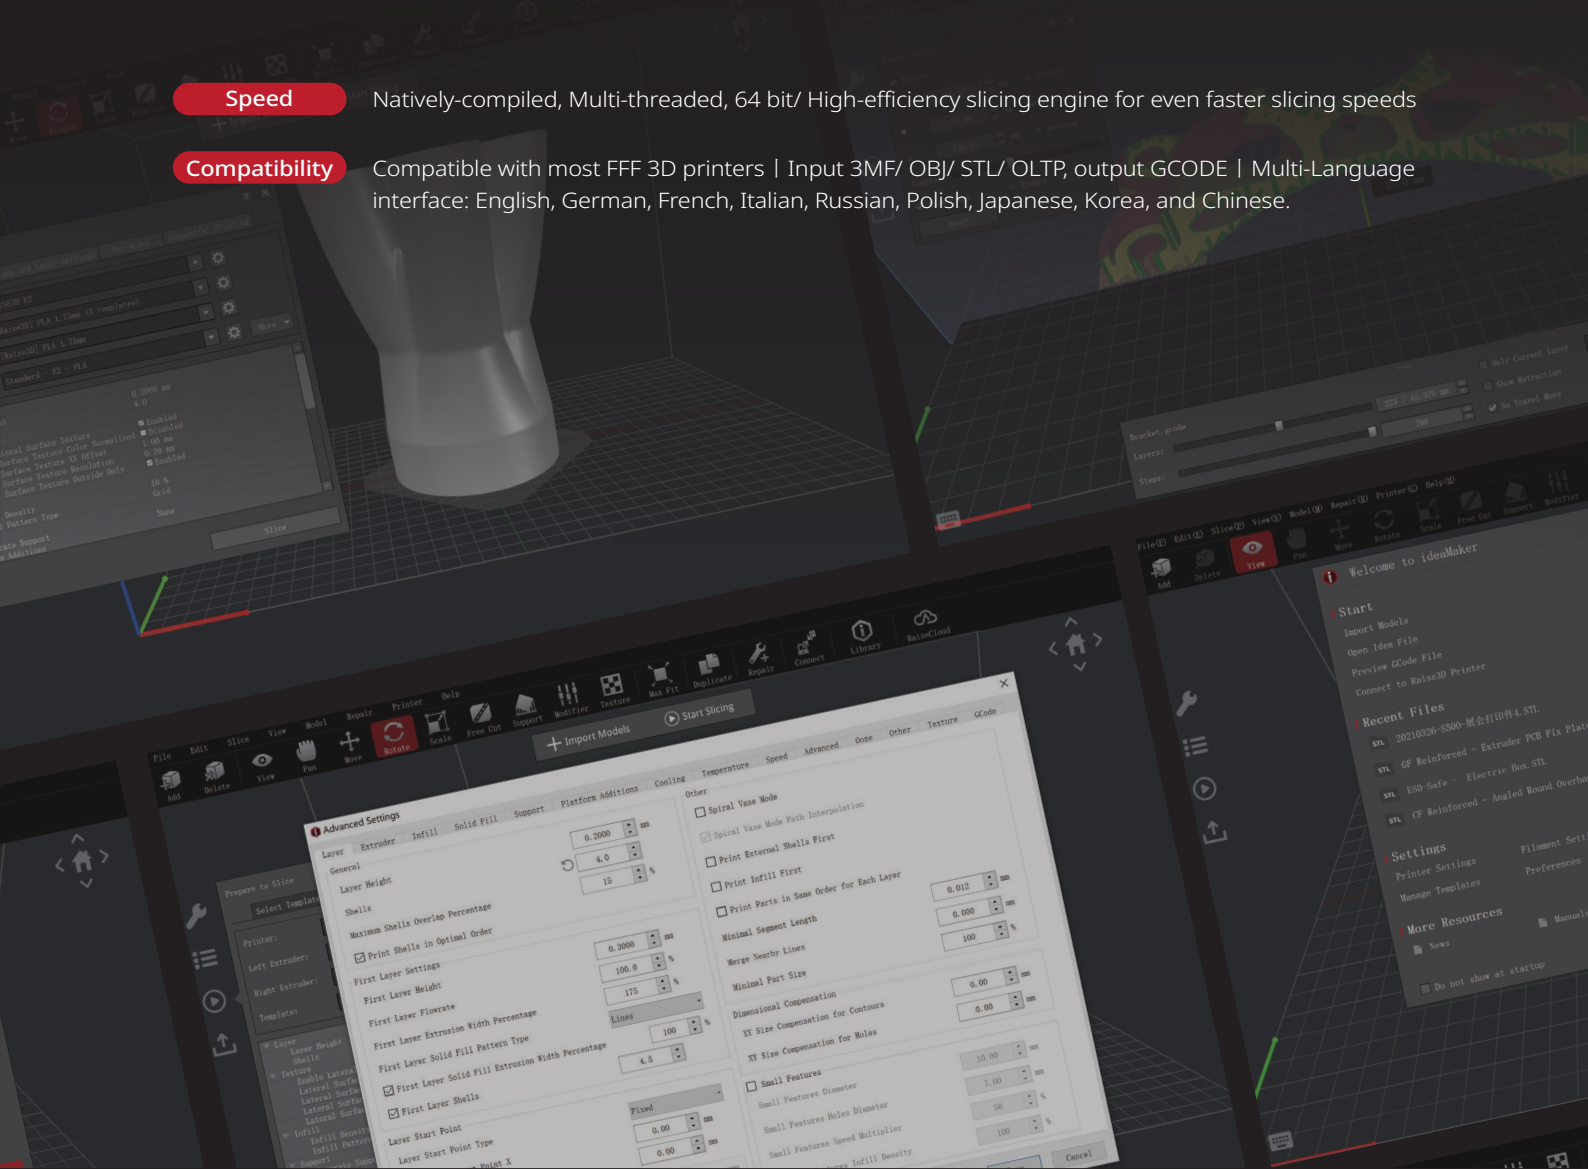

Optimized for Dual Extrusion

## Speed

Natively-compiled, Multi-threaded, 64 bit/ High-efficiency slicing engine for even faster slicing speeds

## Compatibility

Compatible with most FFF 3D printers | Input 3MF/ OBJ/ STL/ OLTP, output GCODE | Multi-Language interface: English, German, French, Italian, Russian, Polish, Japanese, Korea, and Chinese.

# Raise3D Software Solution

**ideaMaker** is part of Raise3D's software ecosystem, providing users with a seamless **3D printing workflow**. Users can easily connect to RaiseCloud and ideaMaker Library with just one click using ideaMaker. The ecosystem also includes the Open Filament Program (OFP) and Raise3D Academy.

**ideaMaker** Full Coverage Software Ecosystem
